

# PATENT BATH COCKS.

---

The use of the **BATH** having now become so general that very few Houses of respectability are found without it, these Cocks are made for the purpose of supplying the same with Hot and Cold Water, and for emptying it after use; they are decidedly of better construction, more readily fixed, and easier in action, than any other contrivance employed for that purpose.

The smaller Size are the

## PATENT BASIN COCKS,

For supplying Wash-table Basins with Hot and Cold Water, and for emptying the same, the advantages of which are so apparent as to need no recommendation; they are adapted for Club Houses, Hotels, Gentlemen's Dressing Rooms, and all other situations where a Washing-stand is a convenience.

N.B. In almost every House the Kitchen-boiler might be made available for yielding a supply of Hot Water to the Bath, and for other purposes on either Floor.

# PATENT BATH COCKS.

The use of the BATH Cock is very simple and easy to be understood by any person. It is a small and portable cock, and is used for the purpose of stopping the water from running out of the bath when it is not required. It is made of brass and is of a simple and elegant design. It is sold at a very low price, and is a very useful and necessary article for every household.
